

## 5 Steps to Flawless, Streak-free Windows

Getting windows their shiniest is easy with the right techniques and tools:

1. Rinse the window to remove large debris.
2. Check that your squeegee channel is perfectly straight, then place the rubber blade at the top of the dry, right-hand edge.
3. Pull the squeegee across the window, pulling the top of the channel out first (maintain an angle of about 15 – 20 degrees). Pull the squeegee ¾ of the way across the window and then down to the bottom.
4. Using a towel, wipe the squeegee blade, top and edges dry and repeat the same steps to finish the window.
5. Carefully wipe the remaining water from the edges of the window to get that flawless, finished look!

EA

**44 Gallon Brute**  
Part# 1650240  
Innovative venting channels make lifting out liners up to 50% easier, improving productivity and reducing the risk of injury; Integrated cinches secure the liner, allowing for efficient knot free liner changes. Tested to 20,000 cycles.

**\$224<sup>27</sup>**  
EA

**Janitor Cart**  
Part# 1200154  
Collect waste and transport tools for efficient cleaning. Smooth, easy-to-clean surface; Non-marking 8" (20.3 cm) wheels and 4" (10.2 cm) casters.

**\$194<sup>51</sup>**  
EA

**Pulse Floor Tool**  
Part# 9860318  
Red ergonomic trigger handle dispenses three streams of cleaning solution with each press; Lightweight construction - weighs only 4 lbs when fully loaded with solution. Green Cleaning and LEED Credits.

**\$29<sup>76</sup>**  
EA

**Dust Wand With Sleeve**  
Part# 9862075  
20" flexible wand conforms to irregular surfaces for easy cleaning; High-pile sleeves reach into crevices effectively removing dust, dirt and grime. Green Cleaning & LEED credits

**\$7<sup>81</sup>**  
EA

**Waste Basket**  
Part# 1650611  
All-plastic construction won't chip, rust or dent; Rolled rims add strength, and are easy to clean.

**\$9<sup>15</sup>**  
EA

**Wet Mop Looped End Large**  
Part# 9610055  
Made from a unique blend of yarn that enables superior absorbency while withstanding repeated commercial laundering up to 60 times; Heavy duty poly coated headband mesh withstands harsh chemicals, laundings for the life of the mop and abuse when headband is used as a scrubber; Looped-end construction allows for maximum floor coverage while eliminating tangling, fraying and linting.

**\$9<sup>07</sup>**  
EA

**24" Push Broom Stiff**  
Part# 9610143  
Durable heavy duty polystyrene makes this broom ideal for sweeping the heaviest soils on rough surfaces in wet or dry applications; Can be used with strong solvents/acid and abrasive scrubbing.

## Sweep or Scrub?

The decision to sweep or scrub is not always straightforward. "Clean" can mean anything from getting rid of dirt on a floor to creating a shiny, scuff-free surface. Your cleaning goal will be a key factor in your equipment choice. For example, if "clean" means getting rid of forklift tire marks and other stains in addition to dust and debris, then your cleaning process must include scrubbing as well as sweeping.

|                                  | SWEEP | SCRUB | SWEEP/SCRUB |
|----------------------------------|-------|-------|-------------|
| Light, bulky debris              | ✓     |       |             |
| Heavy or wet debris              | ✓     |       |             |
| Dust control                     | ✓     | ✓     | ✓           |
| Oil or grease                    |       | ✓     |             |
| Floor marks                      |       | ✓     |             |
| Light debris, plus oil or grease |       |       | ✓           |

**Northern Glo Floor Finish**  
Part# R0301605  
An excellent, low maintenance green coating with outstanding resistance to scuffs, scratches, black heel marks and detergent scrubbing. For use on all resilient tile floors and most types of terrazzo, marble, concrete, and quarry tile.

# Choosing the right equipment size.

Selecting the optimal size of equipment requires careful consideration of the areas to be cleaned. To help with your decision, you should assess the following:

- Minimum aisle width
- Type of aisle – dead end or open end
- Total square footage of cleanable area
- Narrowest doorway the machine must pass through for cleaning or dumping

Oftentimes, the most optimal solution is not the smallest sized machine, but rather a machine where the cleaning path and capacity makes the most sense for the space. For instance, being able to clean halls in just two passes instead of three saves significant labour time and cleaning costs.
